Capital Asset Renewal Funds and Plans

The Board of Education believes that all students deserve a quality learning environment. Consequently, the District should have a plan governing how all physical facilities that house and support the education programs of the District can be continuously maintained, regularly revitalized, and constructed using current best practices and methods that promote student learning. Such a plan should reflect actual funding capacity while supporting the goal of adequate funding to meet this policy goal.

The District should extend the useful life of District facilities, ensure public capital investments are properly preserved, and reduce deferred maintenance costs by:

- 1) Developing a 20-~~20~~2017-2020 Capital Asset Renewal Plan (CARP) to ensure that all physical facilities are properly maintained, revitalized, and constructed using current best practices and methods that promote student learning. Such a plan should reflect actual funding capacity while supporting the goal of adequate funding to meet this policy goal.
